1. firmware update: for android - 3.4. 2 the following devices are supported by the universal version of the firmware update, you must have your device connected to the computer via a usb cable before you start the update. i want to update my ericsson mw600 to android 1.5, to downloade: download: firmware download.I have a Sony Ericsson phone (WM600) which is not recognised as an android phone when connecting it to a computer. So I can't update the firmware. There is the firmware update for Xperia X1 and Xperia X10 but I can't find the one for WM600. I'm an amateur radio geek and in February 2013, i bought a Sony WM600 phone which is 2.3 android with microsd card support. The phone is not working properly. Download the firmware file for Sony Ericsson WM600. Sony Ericsson WM600 has a 1.3 firmware. For more details see Similar problems have arisen with Sony Ericsson WM530 and Sony Ericsson WM570. In this procedure, I updated the firmware of my Sony Ericsson phone (wm600). If you are a new user, make sure that you have the firmware file for your phone. This means that you can't replace the original firmware file. To download the firmware update, click here. Download this file in any device compatible with the firmware update.download. If this file was installed correctly, the Sony Ericsson WM600 should restart. To check this, press the Home button, and if you see the new mobile, an upgrade is complete. You can also check the data channel by pressing the menu button, then scroll the phone screen to the data service, and press the Data channel button to access the data channel of your phone. After it stopped to restart again, enter into menu and select the screen. Next to the user interface, select the file to be updated and then hit the "OK". The phone will reboot and finish the firmware update. The Sony Ericsson WM600 phone was replaced with a new one, and was installed with the latest firmware version that is provided by the time of this update. This procedure was carried out successfully without any problems. Download the firmware for Sony Ericsson WM600. Important The firmware that is provided by the phone, and the one that is downloaded on the phone, are identical. The phone is not supported if there are no official firmware. So be sure to use a firmware file that you downloaded from the 82157476af
